X 100 – BATHTUB

The X 100 Bathtub is an electronic bathtub designed to provide quick and effective showers with the least effort. A design that will be suitable to save time in fast societies that we live in. It is also convenient for companies with a large number of employees who will need shower facilities after work.

BENEFITS

The X 100 can offer a quick shower for as fast as 45 seconds at the desired temperature.

- Fast Showers
- Configurable Temperature
- Configurable Time of Shower
- Less Messy
- Self cleaning Bathtub
- No Water Leaks

An Ideal Bathtub to have fast showers.
OPERATION

The white ring will spray water within the ring where the individual who wishes to shower will stand, the ring will move upwards and downwards spraying water in a slow motion. Then extra water will be sprayed from the top of the bathtub for the hair to be washed. The ring will complete its cycle in 30 seconds and the water from the top will be sprayed for 15 seconds.

TEMPERATURE ADJUSTMENT

The black box is the temperature menu where the temperature of the water can be set as desired. The box will also have a spraying button in order for the user to remove the cold water previously in the pipes until the water at the temperature he has set flows in.

CYCLES

A button within the tub can be pushed to begin/repeat the cycle of the ring as many times as desired.

CLEANSING

The used water will be sucked away at the bottom after the completion of the shower.

DESIGN

The surrounding material of the bathtub is consisted of blue see-through glass and the bottom and top flat parts are designed from hard durable plastic. Two water pipes are connected at the bottom 1) for fresh water to be sprayed and 2) for used water to be sucked away. The X 100 Bathtub operates with electricity.
