

# HANDS-FREE BLUETOOTH

## Be connected to the world

### NEW HEARING TECHNOLOGY

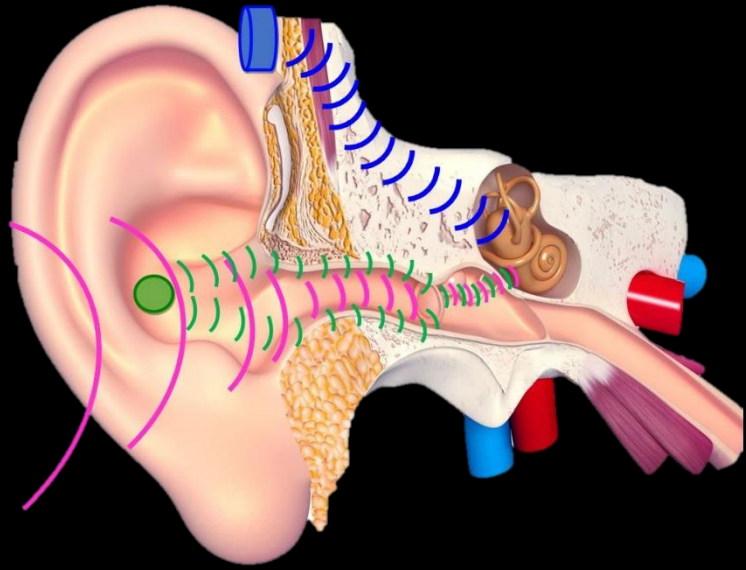

### CARTILAGINOUS CONDUCTION

Cartilaginous conduction technology allows hear everything around/surround you.

**Air conduction:** natural hearing, the sound waves travel through the auditory canal, passing through the middle ear, to the inner ear.

**Bone conduction:** the vibrations are transmitted through the bone (avoiding the middle ear) to the inner ear.

**Cartilaginous conduction:** the vibrations travel through the cartilage to the eardrum where they converge with natural hearing.

### ADVANTAGE

- Allows you to hear the environment
- Great discretion, almost invisible
- More comfortable, free ear canal
- Clearer grave sound
- Doesn't cause hearing damage

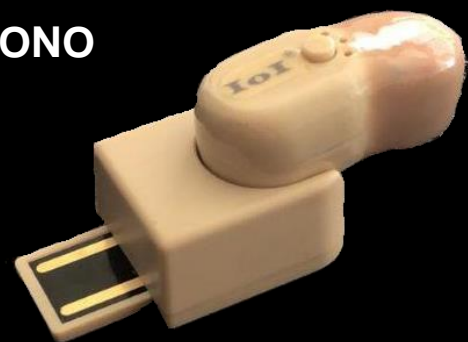

### CHARACTERISTICS

- Autonomy 3 hours
- Bluetooth 5.0
- Advanced controls: +/- ▶ / ||
- Receiving Calls
- SIRI connection, OK Google, ...

### STEREO

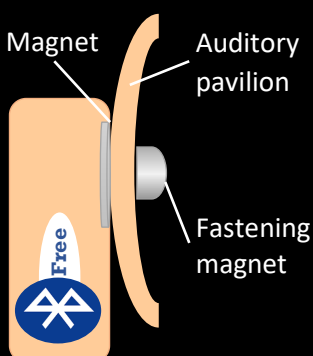

### MONO

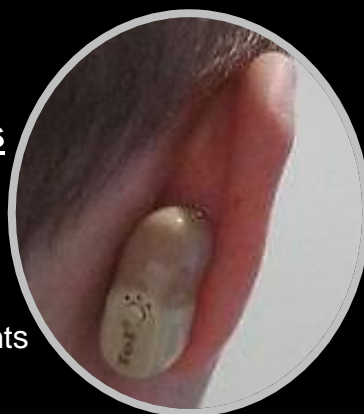

### PLACEMENT

#### Magnetic fixation

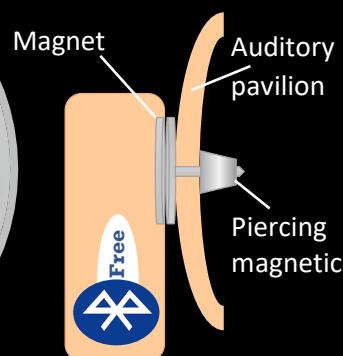

#### Applications

- Playful
- Offices
- Drivers
- Dependents

#### Mechanical fixation

#### Applications

- Swimming
- Cycling
- Running
- Outdoor sport
